# SCOPI Supervisory Board & Executive Board for the Period 2021 – 2024 Election Result and Members General Assembly Meeting 2021

by David Nicholas Franztius & Natasha Trisyani Winata

On Monday, April 12, 2021, the Sustainable Coffee Platform of Indonesia (SCOPI) has held a physical and virtual meeting through Zoom. This Members General Assembly Meeting was held specifically for SCOPI members and was attended by 50 SCOPI members from various backgrounds, including private sector, NGOs. cooperatives, and farmer organizations. The Members General Assembly Meeting was opened by the Executive Director of SCOPI, Paramita Mentari Kesuma, and continued with the

the Executive Board for the period 2018 - 2021, Irvan Helmi, that includes financial accountability

#### Handover Report from the Chairman of

and activity report during his tenure.

01

02

The selection method is conducted directly through a live poll with a total of 35 voting rights from 35 SCOPI members witnessed by the Chairman of the Supervisory Board for the period 2018 - 2021, and ultimately, the Chairman of Executive Board for the period 2021-2024 has been elected with the following arrangements:

# **Executive Board**

Chairman	: Richard Atmadja (PT. Mayora Indah, Tbk)
Vice Chairman I	: Wildan Mustofa (CV. Frinsa Agrolestari)
Vice Chairman II	: Putra Agung (Rainforest Alliance)
Members	:
1. Syahrudi (PT Nestlé Indonesia Tbk)	

- 2. Puji Sumedi (Yayasan KEHATI)
- 3. Wagianto (PT. Indo Cafco ECOM)
- 4. Kiki Purbosari (RIKOLTO)
- 5. Senthil Nathan (Enveritas)
- 6. Eko Purnomowidi (Klasik Beans Cooperative)
- 7. Jeni Pareira (Wildlife Conservation Society)
- 8. Erwin Novianto (FAIRTRADE Network of Asia & Pacific Producers)

# Supervisory Board

**Chairman** : Irvan Helmi (Anomali Coffee)

Members

- 1. Fitrian Ardiansyah (Yayasan Inisiatif Dagang Hijau)
- 2. Dumasi M. M. Samosir (PT. Asuransi Sinar Mas)

The SCOPI members surely hope that the Chairman of Executive Board along with the members, as well as the Chairman of Supervisory Board along with the members for the period 2021 - 2024 will be able to contribute better and can strengthen relations with the Central Government, Local Government, Partners, Market Stakeholders, SCOPI Master

#### Trainers and coffee farmers in Indonesia.

# Editor's Note

#### Greetings, #CoffeeWarrior!

Welcoming the Pancasila Day on June 1, 2021, for this edition of KAPUCINO we would like to communicate the importance of diversity. Diversity can be a huge challenge if we do not face and manage it well. Nevertheless, from another perspective, diversity itself can be the source of huge power and resilience. Just like "Bhinneka Tunggal Ika", unity in diversity.

As Mahatma Gandhi says, "Our ability to reach unity in diversity will be the beauty and the test of our civilization." In achieving sustainable coffee in Indonesia or the globally, diversity has also become an essential which we should put forward. Whether in relation to the coffee plants, supporting human resources, knowledge, etc. However, we need to work together to provide solutions for the various challenges in today's coffee sector in Indonesia, especially at pandemic times.

As a multi-stakeholder platform, SCOPI tries to gather various forms of diversity and to develop it into a common strength in numerous collaborations and cooperation along the coffee supply chain. The diversity of SCOPI members and the balance of their representativeness as an

Annasytassya Nurul Hidayati

association are also the grounding principles which SCOPI try to maintain.

Therefore, as the Highlight of this edition of KAPUCINO, SCOPI presents the coverage of the 2021 Members General Assembly, where the Election of SCOPI Executive Board and Advisory Board for the Period of 2021-2024 had taken place. At the end of this edition, we also portray the profiles of the Board members. Once again, congratulations for the elected Members' representatives. Additionally, we would like to thank the 2018-2021 SCOPI Executive Board and Supervisory Board for their contributions, dedications and thoughts for SCOPI.

Furthermore, we realize that the cultural diversity of coffee farmers in Indonesia is very influential for the coffee produced. Of course, this has become a strength and wealth for our country. To know more, you may read the article written by a representative of SCOPI Members, Klasik Beans Cooperative, about the story of coffee farmers in Waerebo Village, Manggarai Regency, East Nusa Tenggara Province. Moreover, there is also the coverage of Diskusi Kopi (DISKO) which has been held by SCOPI on Climate Change Adaptation for the Indonesian Coffee Farmers on the 15 April 2021.

We also would like to wish Eid Mubarak - 1442 H and also Happy Vesak Day - 2021 for all of #CoffeeWarriors who celebrate them!

Towards #sustainablecoffee!

# The Mind of Coffee Farmers

#### by Abyatar (Koperasi Klasik Beans)

"I used to walk for three days to Colol, following the south coast of Flores and turn into the mountains. For a total of seven day round trip, I walked with 2 friends. There I took the coffee seeds that grew under the fruiting tree. I unplugged, neatly arranged on a banana leaf that had been cut, then closed and tied to keep it moist all the way back to Waerebo." Said Ame Rafael when sharing on how Arabica coffee can be grown in Waerebo village.

plant and wed vanilla to bear fruit, as well as various types of forest plants that can be processed into cuisine. Everything is so viscous within the daily life of the community. Waerebo can be said to be a subsistence village, living and meeting its needs from the natural produce of its own village. This lifestyle is rooted in their collective belief in maintaining the entire Waerebo living space. Waerebo people, including Ame Rafael believe that their life value is to preserve Waerebo's forests, mountains, rivers, culture, and springs.

Ame Rafael is a portrait of the statistics that say 96% of coffee farmers in Indonesia are people farmers. Farmers who cultivate their land with a truly diverse ideology and thought base. This precondition is the basis of a large order of Indonesian coffee character that is full of diversity. Differences are inevitable due to the base of scattered production modes is not only in the context of infrastructure and economic access, but also the realm of mind that can be very ideological. Ame Rafael is a portrait of coffee farmers throughout Indonesia. Farmers whose minds and lives go beyond the problem of coffee discursus of "cut or grind". Coffee is only a small part of his life that is so complex.

That afternoon as usual the fog was coming down from the hillside suburb of Waerebo village. The village in Flores is famous for its

cone-shaped houses and the living community who isolates themselves from the modern life. I was lucky to be able to stop by the village many times because Klasik Beans process their coffee there. When I further asked regarding the coffee in Waerebo that afternoon, I was reminded that the coffee cup in front of me might have been my 6th glass that day. There, whenever

you stop by someone's house and sit down to talk, coffee is always served. Coffee comes from the farms around the village. Coffee of which the inductees' seeds were taken 60 years ago by Ame Rafael. In his confession, he just wanted to find coffee seeds to plant. At a minimum, the coffee can then be drunk by the villagers. The seeds that are not too many were then planted in his farm that is mixed and full of various food crops. Similar to the concept of plantations that are now called permaculture. From those small number of trees, many times he and the community re-seedling it. Until now, coffee from Waerebo has been sent and spread in cafes in Europe.

In a series of research, I discovered so much amazing things from the village's local knowledge. For example, about the way people

Indonesian coffee farmers are human beings with a vast nature of mind. Farmers who also still have to think whether their goats have been fed enough, cinnamon trees can already be harvested, or the next day they must take part in the repair of ancestral tombs. It is all a complete picture of how diversity of Indonesian coffee is an inescapable inevitability.

\*nb: Ame Rafael died at the age of 93 in 2020, when Waerebo just took the decision to close their village completely from tourists. Coffee, whose seeds he took on foot for a week became a supporter of village income when Waerebo was completely closed from tourists. His clear mind and sincerity in his doing, has been and continues to transcend the challenges of the times. For me, that's

#### build their houses that are so iconic, how to

sustainablity.

# **Coffee Discussion (DISKO): Climate Change Adaptation for Coffee Farmers in Indonesia**

by Natasha Trisyani Winata

On April 15, 2021, SCOPI together with PT. Indo Cafco - ECOM and Winrock International have held a virtual DISKO event entitled Opening Bemarks Paramita "Climate Change Adaptation for Coffee Farmers in Indonesia". Socaker As a member of SCOPI, Sembiring SCOPI Arabica PT Indo Cafco - ECOM r Trainer has collaborated with Live on: Winrock International in researching the impacts 🎐 Øscopi id 🛛 🥈 SCOPI 🛛 😨 Susteinable Gattee Pletform of Indonesia 🛛 in Susteinable Coffee Pletform of Indon of climate change to coffee farmers in Indonesia, where the results of this study are expected to contribute as a foundation to climate change adaptation modules that can be implemented for coffee farmers in Indonesia. The preparation of this module also received a lot of support from various parties, including the private sector and academics from the Centre for Risk Climate and Opportunity Management (CCROM) in Southeast Asia and the Pacific, IPB University, and also SCOPI Master Trainer as coffee farmer assisted by PT Indo Cafco – ECOM, whose benefits are expected to be received especially by the Master Trainers.

esia (SCOFI) 🛛 Øscopl\_id 🔹 www.scopi.or.

The DISKO event was held through Zoom and broadcasted live through

SCOPI's YouTube account, and has been attended by a total of 274 participants. Participants who have attended this event come from various backgrounds; NGOs, the private sector, government officials, academics, and students, as well as SCOPI Master Trainers. The discussion began with the speakers presenting their discussion materials in accordance with their field of work, followed by a 60-minute discussion and question and answer session. During the session, participants have been active in expressing their opinions, inputs and support related to the material delivered by the event speakers.

The benefits of the material presented in this DISKO event were also felt by the participants, in which 88% of the total number of participants who joined through Zoom Webinar felt the need to convey the material that has been obtained from this discussion to their closest circle or colleagues. Through this event, SCOPI hopes that coffee farmers in Indonesia get more insights related to climate change adaptation for coffee crops in order to maintain the quality of their coffee crops.

# Chairman of SCOPI Executive Board for the Period 2021-2024: Richard Atmadja (PT. Mayora Indah Tbk)

by Annasytassya Nurul Hidayati

"SCOPI needs to be better known by the Local Government and the Central Government. This is a step for SCOPI to be known as a household for sustainability coffee."

At first, PT Mayora Indah Tbk had refused when being offered initially to become a member of SCOPI. However, through discussions with Mr. Moenardji Soedargo, finally in 2015, PT Mayora Indah Tbk officially became a member of SCOPI. This man who was born in 1988 studied his master's degree at Monash University majoring in Accounting. Mr. Richard is Purchasing Manager at PT Mayora Indah Tbk since 2011. Mr. Richard was a Member of the SCOPI Executive Board for the period 2018-2021. In his opinion, during his time as a member of SCOPI, many changes had occurred in SCOPI, certainly in a better and bigger direction.

On the upstream side, SCOPI has taken a major role in supporting the improvement of farmers' quality by publishing the National Sustainability

and external side; such as campaigns and promotions. With the strengthening of the Secretariat Team and the current Executive Board and Supervisory Board, SCOPI is expected to establish better relations with local and central governments. Audience, discussions, or "visit" with the Government are also indispensable in order for SCOPI to be better known by the Government and also as a reminder to the Government about the importance of sustainability for the coffee sector in Indonesia. This is a step for SCOPI to be known as household for sustainability coffee in Indonesia. Campaigns or promotions related to "Sustainable Coffee" also need to be our main concern together

Curriculum (NSC) for Arabica and Robusta and continuously updating its modules. SCOPI's main task is to make improvements on the downstream to increase public awareness of this concept. This is our joint mission in the long term for the larger role of SCOPI in the Indonesian coffee sector.

### Vice Chairman I of SCOPI Executive Board for the Period 2021-2024: Wildan Mustofa (CV. Frinsa Agrolestari)

by Annasytassya Nurul Hidayati

"It is time for us (SCOPI) to do something more relevant, concrete, and profound, not only on-the-surface discussions."

The owner of CV Java Frinsa Estate, Mr. Wildan Mustofa, is an agricultural graduate who has been working in the field for more than 11 years. His business is located in Pangalengan, Bandung, West Java with an altitude of about 1,350 - 1,750 masl. Since the beginning of SCOPI, Mr. Wildan Mustofa has become a member. Through many discussions with Mr. Moenardji Soedargo, Mr. Wildan found a common vision and mission with SCOPI, one of which is about environmental conservation. The application of conservation in his coffee farm is manifested by the concept of agroforestry farm by paying attention to agro-climate and intensive concepts to pursue the quantity side.

Previously, he was a Member of SCOPI Executive Board for the period 2018-2021 and a Master Trainer of SCOPI to date. According to him, there have been many contributions made by SCOPI in helping

tasks to be done since the journey to "Sustainable Coffee" in Indonesia is still far. SCOPI is expected to be a forum that "colors" stakeholders in the coffee sector for both upstream and downstream practices. On the upstream side, SCOPI's action plans and tools must be more relevant and in-depth, not only on-the-surface discussions or introductions. For example - in pruning training, the training should cover not only how to prune properly but also what kind of pruning and application are suitable for different trees. In addition, SCOPI should also look at the potential diversity of coffee farmers spread in Indonesia. Farmers who become specialists in one area is better than farmers who

06

#### farmers, but it is undeniable that there are still many

#### know has general knowledge on all area.

# SCOPI Executive Board for the Period 2021-2024

Vice Chairman II of SCOPI Executive Board:

#### Putra Agung (Rainforest Alliance)

Putra Agung is the Director of the Rainforest Alliance Indonesia from February 2021. He joined Rainforest Alliance in 2019 as Team Manager for Palm Oil in Indonesia. Agung previously worked with the World Agroforestry Center (ICRAF), Yayasan WWF Indonesia, Forest Watch Indonesia. and He specializes in GIS implementation, work policy through public advocacy and campaigns, climate change mitigation, landscape policy and governance, and commodity supply chains. Agung hopes that SCOPI in the future can reach farmers and the actors in supply chains of coffee and be the center of excellence in coffee sustainability in Indonesia.

Members of SCOPI Executive Board for the Period 2021-2024

Rudi Syahrudi (PT Nestlé Indonesia)

At the beginning, **Syahrudi** joins Nestlé Indonesia as an agronomist, supporting partnerships and development programs for coffee farmers. In 2005, he moved to Nestlé Sri Lanka, and focused on dairy development. Returned to Indonesia and started his focus on developing dairy farming in East Head of Milk the Java as Procurement & Dairy Development. Currently, he is trusted as the Head of Corporate Agriculture Services. Previously, he had served as the member of SCOPI's Executive Board for the period of 2018-2021.

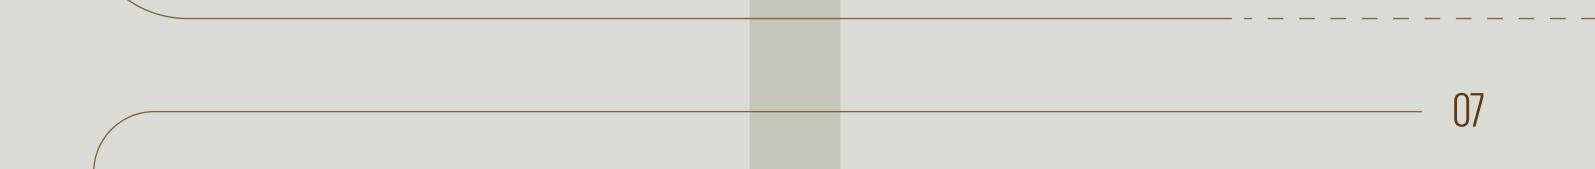

### Puji Sumedi (Yayasan KEHATI)
